POA&M ITEMS - ACTIVE

ITEM #1

Control: 3.13.2 (Security Engineering Principles)
Weakness: Security engineering principles not formally documented in system design documentation.
Risk Level: Low
Planned Action: Develop System Architecture Document capturing security engineering decisions (defense in depth, least privilege, fail-safe defaults).
Owner: Sandra Okonkwo
Target Date: September 30, 2026
Milestone 1: Draft outline - August 1, 2026 (ON TRACK)
Milestone 2: First draft - September 1, 2026
Milestone 3: Final approval - September 30, 2026
Status: IN PROGRESS (milestone 1 met)

ITEM #2

Control: 3.3.6 (Audit Reduction and Reporting)
Weakness: Scheduled audit reduction report not automated; currently generated manually on-demand only.
Risk Level: Low
Planned Action: Configure Sentinel scheduled workbook to auto-generate weekly summary report and email to Sandra Okonkwo.
Owner: Sandra Okonkwo
Target Date: August 31, 2026
Milestone 1: Research Sentinel report automation - July 15 (DONE)
Milestone 2: Configure and test - August 31, 2026
Status: IN PROGRESS

CLOSED POA&M ITEMS (last 6 months)

ITEM C-01 (Closed April 15, 2026)

Control: 3.5.3 (MFA)
Weakness: MFA not enforced for one legacy application.
Action: Migrated app to Azure AD SSO with MFA.
Evidence: Conditional Access policy verified. Closed.

ITEM C-02 (Closed May 30, 2026)

Control: 3.8.1 (Media Protection)
Weakness: USB drive inventory not formally documented.
Action: Created Media Inventory Register in SharePoint.
Evidence: Register verified with physical audit. Closed.
