ASJ REALTY
CRYPTOGRAPHIC KEY MANAGEMENT POLICY

=====

Document ID: POL-SC-010
Version: 1.0
Effective Date: July 5, 2026
Review Date: July 5, 2027
Owner: Sandra Okonkwo, IT Coordinator
Approved By: Anthony James, Principal Broker

=====

1. PURPOSE

This policy establishes requirements for generating, distributing, storing, retiring, and destroying cryptographic keys used to protect CUI at ASJ Realty.

2. KEY MANAGEMENT REQUIREMENTS

2.1 BitLocker Recovery Keys

- Generated automatically by Windows during BitLocker setup
- Escrowed to Azure AD (automatic - enforced by Intune)
- Access to retrieve: Sandra Okonkwo only (Azure AD admin)
- Never printed or stored in plaintext documents

2.2 Azure Key Vault Keys (SharePoint / Azure Storage)

- Customer-managed keys stored in Azure Key Vault
- Vault name: asjr-keyvault (East US region)
- Key rotation: annually (each July 1)
- Access policy: Sandra Okonkwo only (Key Administrator role)
- Soft-delete and purge protection: ENABLED

2.3 VPN Certificates / Pre-Shared Keys

- VPN certificates issued from internal CA (renewed annually)
- If PSKs are used: minimum 32 characters, stored in vault
- Certificate expiry monitored and renewed 30 days before expiry

2.4 Email Encryption Keys (S/MIME or MIP)

- Microsoft Information Protection uses tenant-managed keys
- Key management delegated to Microsoft for standard tier

3. KEY RETIREMENT AND DESTRUCTION

- Keys are retired when: compromised, expired, or no longer needed
- Retired keys are destroyed (Azure Key Vault: key deleted + purge after soft-delete period)
- BitLocker key destruction: issue new recovery key, delete old

4. AUDIT

Azure Key Vault logs all key operations. Reviewed quarterly.
