ASJ REALTY

AUDIT LOGGING FAILURE ALERT POLICY

=====

Document ID: POL-AU-004

Version: 1.0

Effective Date: May 25, 2026

Review Date: May 25, 2027

Owner: Sandra Okonkwo, IT Coordinator

Approved By: Anthony James, Principal Broker

=====

1. PURPOSE

This policy ensures that ASJ Realty is alerted immediately when audit logging processes fail, so that logging gaps are minimized and responded to promptly.

2. AUDIT FAILURE SCENARIOS AND ALERTS

The following audit failure conditions generate immediate alerts:

a) Log Forwarding Failure

- If any device stops forwarding logs to Microsoft Sentinel for more than 15 minutes, Sentinel generates an alert emailed to Sandra Okonkwo.

b) Log Volume Anomaly

- If a data connector reports zero events for a period when events should be flowing, an alert is triggered.

c) Agent Health Failure

- If the Log Analytics agent (AMA) on any device reports a health issue, an alert is triggered within 5 minutes.

d) Disk Full - Log Partition

- If the log storage partition on any server reaches 80% capacity, an alert is sent to Sandra Okonkwo.

3. RESPONSE PROCEDURE

Upon receiving an audit failure alert, Sandra Okonkwo must:

- Acknowledge the alert within 2 hours during business hours
- Investigate and restore logging within 4 hours
- If logging cannot be restored, report to Anthony James and restrict system access until logging is restored
- Document the outage and resolution in the IT log

4. LOG RETENTION DURING OUTAGE

Local Windows Event Logs are retained for 7 days on each device, providing a buffer if SIEM forwarding fails.
