

■ IDENTIFICATION AND AUTHENTICATION IMPLEMENTATION EVIDENCE

Organization: ASJ Realty

Control: 3.5.11 - Authentication Feedback Obscuring

Prepared By: Sandra Okonkwo, IT Director | Date: 2026-07-10

1. SUMMARY

Evidence that ASJ Realty obscures authentication feedback on all CUI system login interfaces.

2. AUTHENTICATION INTERFACE REVIEW

Date: 2026-06-20 | Reviewer: Sandra Okonkwo

Interfaces reviewed: Windows 11 Login, Azure AD / M365 Web Login, VPN Login, SharePoint

Windows 11 Login (ASJ-WS-001):

- Password field: Masked (dots) by default
- Error message: "The user name or password is incorrect" (generic - does not specify which)
- Credential Manager: Not saved for CUI resources

Result: PASS

Azure AD Web Login (login.microsoftonline.com):

- Password field: Masked with asterisks, optional "Show password" toggle
- Error: "Your account or password is incorrect" (generic)

Result: PASS

VPN Login (GlobalProtect):

- Password field: Masked
- Error: "Authentication failed" (generic)

Result: PASS

3. PASSWORD FIELD CONFIGURATION (GPO)

GPO: PasswordFieldMask-ASJ Realty

- DisablePasswordReveal: 1 (hides "show password" eye icon on Windows login)

Applied to: All ASJ Realty Windows endpoints

4. BROWSER SETTINGS

Microsoft Edge policy: PasswordManagerEnabled = False (no password saving on CUI endpoints)

This prevents autofill from potentially exposing credentials.

5. CONCLUSION

All ASJ Realty authentication interfaces obscure password feedback and use generic error messages per control 3.5.11.
