ASJ REALTY
MAINTENANCE PERSONNEL SUPERVISION POLICY

=====

Document ID: POL-MA-006
Version: 1.0
Effective Date: June 20, 2026
Review Date: June 20, 2027
Owner: Sandra Okonkwo, IT Coordinator
Approved By: Anthony James, Principal Broker

=====

1. PURPOSE

This policy requires that maintenance activities performed by personnel without required access authorization are supervised to protect CUI and system integrity.

2. SCOPE

Applies to any maintenance activity performed by:

- External contractors and vendors
- Any third-party technician
- Any individual who has not been granted general access to ASJR systems and facilities

3. SUPERVISION REQUIREMENTS

3.1 Physical Maintenance

- External technicians performing hardware work must be escorted by Sandra Okonkwo (or Anthony James if Sandra is unavailable) from the moment they arrive
- The escort does not need to be a technical expert but must maintain visual oversight of all technician actions
- No unescorted access to server rooms, network equipment areas, or workstations holding CUI

3.2 Software / Remote Maintenance

- Remote maintenance sessions by external parties are monitored by Sandra Okonkwo in real time
- Sandra must be able to terminate the remote session immediately if unauthorized activity is observed

3.3 Cleared Maintenance Personnel

If maintenance is performed by a vendor whose personnel have appropriate background checks and have signed an NDA with ASJ Realty, supervision may be reduced to periodic check-ins (every 15 minutes) rather than continuous oversight.

4. DOCUMENTATION

All external maintenance visits are logged with: vendor, technician name, escorting staff member, time in/out.
