BLUE RIDGE TECHNOLOGY SOLUTIONS LLC
WIRELESS ACCESS AUTHORIZATION POLICY

=====

Document ID: POL-AC-016
Version: 1.0
Effective Date: April 20, 2026
Review Date: April 20, 2027
Owner: Nathan Cruz, Lead Systems Engineer
Approved By: Victor Osei, President

=====

1. PURPOSE

This policy requires that wireless access to Blue Ridge Technology Solutions' network is authorized before users and devices are permitted to connect.

2. WIRELESS NETWORK DESIGN

2.1 Network Segmentation

Three wireless SSIDs are maintained:

- a) BRTS-Corporate: Business network for managed devices only
 - Access to: internal servers, NAS, internet
 - Authentication: WPA3-Enterprise (802.1X/RADIUS)
 - Requires: Intune-managed device + AD credentials
- b) BRTS-Guest: Guest/visitor network
 - Access to: internet only (isolated from corp network)
 - Authentication: WPA2-Personal (rotated weekly)
 - No access to: any company systems or CUI
- c) BRTS-IoT: Security cameras, smart devices
 - Isolated VLAN, no internet, no corp network access

2.2 Authorization Process

- A device must be enrolled in Intune AND joined to the AD domain before it is permitted on BRTS-Corporate
- 802.1X authentication validates both device cert and user credentials against Azure AD

3. PROHIBITED

- Personal (non-company) devices on BRTS-Corporate: PROHIBITED
- Rogue access points: PROHIBITED (scanned for monthly)
- WEP or WPA (first-gen): PROHIBITED

4. GUEST AUTHORIZATION

Guests must request WiFi access from the receptionist.
Guest password is rotated every Monday by Nathan Cruz.
