BLUE RIDGE TECHNOLOGY SOLUTIONS LLC
PORTABLE STORAGE DEVICE USE ON EXTERNAL SYSTEMS POLICY

=====

Document ID: POL-AC-021
Version: 1.0
Effective Date: May 1, 2026
Review Date: May 1, 2027
Owner: Nathan Cruz, Lead Systems Engineer
Approved By: Victor Osei, President

=====

1. PURPOSE

This policy limits the use of company portable storage devices on external (non-company-owned) systems to prevent introduction of malware or unauthorized data exfiltration.

2. POLICY STATEMENT

- Company portable storage devices (USB drives, external hard drives) containing CUI must NOT be connected to external systems (client systems, personal computers, public computers, hotel business center computers, etc.) without prior written authorization from Nathan Cruz.

- If a portable storage device must be used on an external system for business necessity (e.g., delivering files to a client site), it must:
 - a) Be scanned for malware before and after the connection
 - b) Contain only the minimum data necessary
 - c) Be reported to Nathan Cruz within 24 hours

3. PERSONALLY OWNED STORAGE ON COMPANY SYSTEMS

Personally owned USB drives are prohibited on company systems. Intune enforces USB device restrictions: only approved BRTS-issued USB drives are permitted.

4. DATA TRANSFER ALTERNATIVES

Preferred method for file exchange with external parties:

- DoD SAFE (for government clients)
- SharePoint external sharing (with guest access approval)
- Encrypted email attachment (files < 10MB)

5. ENFORCEMENT

USB port access is controlled via Intune Device Control Policy. Unauthorized USB insertions are blocked and logged.
