

■SYSTEM AND COMMUNICATIONS PROTECTION POLICY

Organization: Blue Ridge Technology Solutions LLC

Control: 3.13.11 - FIPS-Validated Cryptography

Version: 1.2 | Effective: 2026-01-15

Owner: Nathan Cruz, IT Manager | Approved: Victor Osei, Director of Operations

1. PURPOSE

This policy requires Blue Ridge Technology Solutions LLC to employ FIPS-validated cryptography when protecting CUI, per NIST SP 800-171 Rev. 2 control 3.13.11.

2. SCOPE

All cryptographic functions protecting CUI at Blue Ridge Technology Solutions LLC.

3. REQUIREMENTS

- a. FIPS 140-2 mode is enabled on all endpoints processing CUI.
- b. Only FIPS-validated cryptographic modules are used for CUI protection.
- c. Non-FIPS algorithms (MD5, RC4, DES, 3DES, SHA-1) are prohibited for CUI protection.
- d. FIPS mode is enforced via Group Policy.
- e. FIPS compliance is verified quarterly.

4. RESPONSIBILITY

Nathan Cruz, IT Manager, enables and maintains FIPS mode on all CUI systems.

5. ENFORCEMENT

Systems with FIPS mode disabled must be remediated within 24 hours.
