

■SYSTEM AND COMMUNICATIONS PROTECTION IMPLEMENTATION EVIDENCE

Organization: Blue Ridge Technology Solutions LLC

Control: 3.13.11 - FIPS-Validated Cryptography

Prepared By: Nathan Cruz, IT Manager | Date: 2026-07-10

1. SUMMARY

Evidence that Blue Ridge Technology Solutions LLC enables FIPS 140-2 validated cryptography on CUI endpoints.

2. FIPS MODE CONFIGURATION

Group Policy Object: FIPS-Mode-Enforcement-Blue Ridge Technology Solutions LLC

GPO Path: Computer Configuration > Windows Settings > Security Settings > Local Policies > Security Options

Setting: "System cryptography: Use FIPS compliant algorithms for encryption, hashing, and signing"

Value: Enabled

GPO linked to: CUI-Computers OU (contains BRTS-WS-001, WS-002)

3. FIPS MODE VERIFICATION

Endpoint: BRTS-WS-001

Registry key: HKLM\SYSTEM\CurrentControlSet\Control\Lsa\FIPSAAlgorithmPolicy

Value: Enabled = 1

Endpoint: WS-002

Registry key: HKLM\SYSTEM\CurrentControlSet\Control\Lsa\FIPSAAlgorithmPolicy

Value: Enabled = 1

4. GPO APPLICATION STATUS

GPO Report run: 2026-06-30 | Tool: gpresult /H on BRTS-WS-001

Result: FIPS-Mode-Enforcement-Blue Ridge Technology Solutions LLC GPO applied. FIPS mode: ACTIVE. PASS.

5. FIPS-VALIDATED MODULES IN USE

BitLocker: Uses AES-128 (FIPS 140-2 validated, Module #1752)

Windows TLS: Uses TLS 1.2/1.3 with FIPS-approved cipher suites

Azure services: FIPS 140-2 Level 1 or higher for all M365 cryptographic operations

6. PROHIBITED ALGORITHMS STATUS

MD5: Disabled for CUI operations (allowed only for non-security checksums in FIPS mode)

RC4: Disabled system-wide

DES/3DES: Disabled system-wide

SHA-1: Disabled for TLS; not used for CUI signatures

7. CONCLUSION

Blue Ridge Technology Solutions LLC enforces FIPS 140-2 validated cryptography on all CUI endpoints via GPO per control 3.13.11.
