

■SYSTEM AND COMMUNICATIONS PROTECTION IMPLEMENTATION EVIDENCE

Organization: Blue Ridge Technology Solutions LLC

Control: 3.13.2 - Security Architecture

Prepared By: Nathan Cruz, IT Manager | Date: 2026-07-10

1. SUMMARY

Evidence that Blue Ridge Technology Solutions LLC employs defense-in-depth architectural design for CUI systems.

2. SECURITY ARCHITECTURE OVERVIEW

Document: Blue Ridge Technology Solutions LLC Security Architecture Diagram v1.3

Location: SharePoint/IT-Docs/Architecture/

Last Updated: 2026-04-01 | Reviewed by: Victor Osei

Defense-in-Depth Layers Implemented:

Layer 1: Identity - Azure AD with MFA, PIM, Conditional Access

Layer 2: Device - Intune MDM, BitLocker, Defender, WDAC

Layer 3: Network - Azure Firewall, NSG, VPN, IDPS, VLAN segmentation

Layer 4: Application - SharePoint RBAC, DLP, sensitivity labels

Layer 5: Data - AES-256 encryption at rest and in transit

Layer 6: Monitoring - Sentinel SIEM, Secure Score, Defender for Endpoint

3. ARCHITECTURE DIAGRAM SUMMARY

[Users w/ MFA] -> [Conditional Access] -> [VPN] -> [Azure Firewall] -> [CUI VLAN]

|

[M365 CUI Site (SharePoint)]

[CUI Endpoints (BRTS-WS-001, WS-002)]

4. VENDOR SECURITY REVIEW (Q1 2026)

New tool evaluated: Freshservice (ITSM)

Security review: SOC 2 Type II certificate reviewed. Data stored in US region.

Approved by: Victor Osei | Date: 2026-01-10

5. CONCLUSION

Blue Ridge Technology Solutions LLC implements documented defense-in-depth security architecture for the CUI environment per control 3.13.2.
