

■SYSTEM AND COMMUNICATIONS PROTECTION POLICY

Organization: Blue Ridge Technology Solutions LLC

Control: 3.13.5 - Network Segmentation

Version: 1.2 | Effective: 2026-01-15

Owner: Nathan Cruz, IT Manager | Approved: Victor Osei, Director of Operations

1. PURPOSE

This policy requires Blue Ridge Technology Solutions LLC to implement subnetworks for publicly accessible system components that are physically or logically separated from internal networks, per NIST SP 800-171 Rev. 2 control 3.13.5.

2. SCOPE

All Blue Ridge Technology Solutions LLC network segments in the CUI environment.

3. REQUIREMENTS

- a. CUI systems reside in a separate, isolated network segment (CUI VLAN).
- b. Guest/public WiFi is isolated from CUI network on a separate VLAN.
- c. Publicly accessible systems (if any) are placed in a DMZ, separate from CUI.
- d. VLAN segmentation is enforced by managed switches and firewall rules.
- e. Nathan Cruz reviews VLAN configurations quarterly.

4. RESPONSIBILITY

Nathan Cruz, IT Manager, designs and maintains network segmentation.

5. ENFORCEMENT

CUI systems on non-CUI network segments must be remediated within 24 hours.

Signed: Victor Osei, Director of Operations | Blue Ridge Technology Solutions LLC | 2026-01-15
