

■SYSTEM AND COMMUNICATIONS PROTECTION IMPLEMENTATION EVIDENCE

Organization: Blue Ridge Technology Solutions LLC

Control: 3.13.5 - Network Segmentation

Prepared By: Nathan Cruz, IT Manager | Date: 2026-07-10

1. SUMMARY

Evidence that Blue Ridge Technology Solutions LLC implements network segmentation isolating CUI systems.

2. VLAN CONFIGURATION

Network Equipment: Ubiquiti UniFi switch + Azure NSG

Managed by: Nathan Cruz

VLAN Layout:

VLAN 10 - CUI Production (10.0.2.0/24):

Devices: BRTS-WS-001, WS-002, CUI SharePoint (via Azure)

Access: Authorized personnel via VPN or physical connection only

Outbound: Only HTTPS to M365, DNS to Nathan Cruz-managed resolver

VLAN 20 - Guest/Public WiFi (192.168.20.0/24):

Devices: Visitor devices, personal mobile

Access: Internet only (full isolation from VLAN 10)

Inter-VLAN routing: BLOCKED

VLAN 30 - Management (10.0.3.0/24):

Devices: Nathan Cruz admin workstation only

Access: Nathan Cruz only, MFA required

3. INTER-VLAN FIREWALL RULES

Rule: DENY all traffic from VLAN 20 to VLAN 10 (Guest to CUI: blocked)

Rule: DENY all traffic from VLAN 10 to VLAN 20 (CUI to Guest: blocked)

Rule: ALLOW specific management traffic VLAN 30 to VLAN 10 only

4. QUARTERLY REVIEW

Date: 2026-06-30 | Reviewer: Nathan Cruz

VLAN config verified via UniFi controller.

Inter-VLAN rules tested: Guest-to-CUI ping attempt: BLOCKED. PASS.

5. CONCLUSION

Blue Ridge Technology Solutions LLC implements VLAN-based network segmentation isolating CUI from guest and public traffic per control 3.13.5.
