

## ■SYSTEM AND COMMUNICATIONS PROTECTION IMPLEMENTATION EVIDENCE

Organization: Blue Ridge Technology Solutions LLC

Control: 3.13.7 - Split Tunneling Prohibition

Prepared By: Nathan Cruz, IT Manager | Date: 2026-07-10

### 1. SUMMARY

Evidence that Blue Ridge Technology Solutions LLC VPN connections do not use split tunneling.

### 2. VPN CONFIGURATION

VPN Solution: GlobalProtect (Palo Alto) / Azure VPN Gateway

VPN Profile: Blue Ridge Technology Solutions LLC-FullTunnel (deployed via Intune)

Split Tunnel Setting:

- Split Tunneling: DISABLED
- Route: 0.0.0.0/0 (all traffic routes through VPN tunnel)
- Exclusions: None (no split tunnel exceptions)

### 3. VPN PROFILE (Intune Configuration Profile)

Profile Name: VPN-FullTunnel-Blue Ridge Technology Solutions LLC

Configuration Type: VPN

VPN Type: IKEv2

Split Tunneling: Not configured (disabled by default in IKEv2 full-tunnel mode)

Traffic Routing: All traffic via VPN gateway

User Override: NOT PERMITTED (Intune-managed, locked configuration)

### 4. FULL-TUNNEL VERIFICATION TEST

Date: 2026-06-25 | Tester: Nathan Cruz

Test: Connected VPN on BRTS-WS-001. Checked external IP address at whatismyip.com.

Without VPN: External IP = 71.44.x.x (home ISP)

With VPN active: External IP = 40.76.x.x (Blue Ridge Technology Solutions LLC Azure gateway IP)

Result: All internet traffic routing through Blue Ridge Technology Solutions LLC VPN gateway. No split tunnel. PASS.

### 5. CONCLUSION

Blue Ridge Technology Solutions LLC VPN routes all traffic through the Blue Ridge Technology Solutions LLC gateway with split tunneling disabled per control 3.13.7.
