

■SYSTEM AND COMMUNICATIONS PROTECTION POLICY

Organization: Blue Ridge Technology Solutions LLC

Control: 3.13.8 - Encryption of CUI in Transit

Version: 1.2 | Effective: 2026-01-15

Owner: Nathan Cruz, IT Manager | Approved: Victor Osei, Director of Operations

1. PURPOSE

This policy requires Blue Ridge Technology Solutions LLC to implement cryptographic mechanisms to prevent unauthorized disclosure of CUI during transmission, per NIST SP 800-171 Rev. 2 control 3.13.8.

2. SCOPE

All CUI transmitted across Blue Ridge Technology Solutions LLC networks and to/from external parties.

3. REQUIREMENTS

- a. All CUI in transit is encrypted with TLS 1.2 or higher.
- b. Weak protocols (SSL, TLS 1.0, TLS 1.1) and weak cipher suites are disabled.
- c. VPN traffic uses AES-256 minimum.
- d. Email containing CUI uses TLS enforcement or S/MIME encryption.
- e. Encryption configuration is reviewed quarterly.

4. RESPONSIBILITY

Nathan Cruz, IT Manager, configures and verifies all CUI transmission encryption.

5. ENFORCEMENT

Unencrypted CUI transmission is a critical security violation.
