

■AUDIT AND ACCOUNTABILITY IMPLEMENTATION EVIDENCE

Organization: Blue Ridge Technology Solutions LLC

Control: 3.3.5 - Audit Log Correlation and Analysis

Prepared By: Nathan Cruz, IT Manager | Date: 2026-07-10

1. SUMMARY

Evidence that Blue Ridge Technology Solutions LLC correlates audit records across multiple sources in a centralized SIEM.

2. SIEM CORRELATION CONFIGURATION

Platform: Microsoft Sentinel

Workspace: Blue Ridge Technology Solutions LLC-Sentinel (tenant: blueridgetech.com)

Data Connectors Active:

- Azure Active Directory
- Microsoft 365 (Exchange, SharePoint, Teams)
- Windows Security Events (via Azure Monitor Agent on BRTS-WS-001)
- Microsoft Defender for Endpoint
- Azure Activity

Active Correlation Rules (Scheduled Analytics):

- Multi-Source Brute Force: Correlates Azure AD failed logins + Windows Event 4625 + Defender alert
- Lateral Movement: Correlates Windows logon events across multiple hosts
- Data Exfiltration: Correlates large file downloads + USB events + email attachments
- Privilege Escalation: Correlates role changes + after-hours admin logon

3. CORRELATION INCIDENT LOG (Q2 2026)

Date: 2026-05-28 - Rule: Multi-Source Brute Force - Fired on 6 failed logins across Azure AD and Windows

Investigation: User forgot new password post-reset. False positive. Account unlocked by Nathan Cruz.

Date: 2026-06-09 - Rule: Data Exfiltration - Large SharePoint download by n.cruz@blueridgetech.com

Investigation: Authorized batch download for offline backup. Confirmed with Victor Osei. Closed.

4. QUARTERLY RULE REVIEW

Date: 2026-07-01 | Reviewer: Nathan Cruz

Result: All 4 rules confirmed operational. 1 threshold tuning applied to reduce false positives.

5. CONCLUSION

Blue Ridge Technology Solutions LLC correlates audit logs from multiple sources using Sentinel analytics per control 3.3.5.
