BLUE RIDGE TECHNOLOGY SOLUTIONS LLC
ACCESS RESTRICTIONS FOR SYSTEM CHANGES POLICY

=====

Document ID: POL-CM-005
Version: 1.0
Effective Date: May 5, 2026
Review Date: May 5, 2027
Owner: Nathan Cruz, Lead Systems Engineer
Approved By: Victor Osei, President

=====

1. PURPOSE

This policy defines and enforces physical and logical access restrictions associated with changes to organizational systems, ensuring only authorized individuals can implement changes.

2. LOGICAL ACCESS RESTRICTIONS

2.1 Production Systems

Only Nathan Cruz may implement changes to production systems. Victor Osei may authorize changes but does not implement them. No other staff have write access to production system configs.

2.2 Change Implementation Accounts

Production changes are implemented using the admin account (adm_ncruz) only, not the standard daily-use account (ncruz). Admin account sessions are logged.

2.3 Code/Configuration Repository

The IT configuration repository (Git on Azure DevOps) has:

- Write access: Nathan Cruz only
- Read access: Victor Osei
- Branch protection: No direct commits to main branch (all changes via pull request, approved by Victor Osei)

3. PHYSICAL ACCESS RESTRICTIONS

Server room access (where physical changes occur) is restricted to Nathan Cruz only via keypad lock. The access log is reviewed quarterly.

4. CHANGE WINDOW RESTRICTIONS

Production changes (except emergencies) are implemented during the approved maintenance window: Saturdays 2-6 AM. All other times require emergency change authorization from Victor Osei before implementation.
