

■CONFIGURATION MANAGEMENT IMPLEMENTATION EVIDENCE

Organization: Blue Ridge Technology Solutions LLC

Control: 3.4.7 - Restrict Software Functions

Prepared By: Nathan Cruz, IT Manager | Date: 2026-07-10

1. SUMMARY

Evidence that Blue Ridge Technology Solutions LLC restricts unnecessary programs, ports, and protocols.

2. FIREWALL CONFIGURATION

Firewall: Windows Defender Firewall + Azure NSG

GPO: Firewall-Baseline-Blue Ridge Technology Solutions LLC

Inbound Rules (CUI Endpoints - Default Deny All except):

- Allow: VPN tunnel (port 443, 500, 4500 UDP from VPN gateway)
- Allow: Intune management (HTTPS 443 to Microsoft endpoints)
- Allow: Windows Update (HTTPS 443 to Microsoft endpoints)
- Block: All other inbound

Outbound Rules:

- Allow: HTTPS 443 (web traffic, M365)
- Allow: DNS 53
- Block: FTP 21, Telnet 23, RDP 3389 to external (blocked at perimeter)

3. SOFTWARE RESTRICTION CONTROLS

Autorun: DISABLED on all drives (GPO: AutorunDisable-Blue Ridge Technology Solutions LLC)

Office Macros: Only digitally signed macros allowed (GPO: MacroPolicy-Blue Ridge Technology Solutions LLC)

WDAC: Windows Defender Application Control policy enforces approved application list

4. QUARTERLY REVIEW

Date: 2026-06-30 | Reviewer: Nathan Cruz

Result: All firewall rules reviewed. 1 legacy RDP rule removed (no longer needed).

5. CONCLUSION

Blue Ridge Technology Solutions LLC restricts unnecessary functions and ports via firewall rules and software policies per control 3.4.7.
