

■IDENTIFICATION AND AUTHENTICATION IMPLEMENTATION EVIDENCE

Organization: Blue Ridge Technology Solutions LLC

Control: 3.5.10 - Cryptographic Password Storage

Prepared By: Nathan Cruz, IT Manager | Date: 2026-07-10

1. SUMMARY

Evidence that Blue Ridge Technology Solutions LLC stores and transmits passwords using cryptographic protection only.

2. PASSWORD STORAGE CONFIGURATION

Platform: Azure AD + Windows AD (tenant: blueridgetech.com)

Azure AD:

- Passwords hashed using Microsoft's proprietary strong hash algorithm (PBKDF2 variant)
- Microsoft SOC 2 Type II certified - no plaintext storage confirmed
- Reversible encryption: Not available (Azure AD does not offer reversible password storage)

Windows Active Directory:

- Password hashing: NTLM v2 hash (domain functional level 2016)
- Reversible encryption: DISABLED (GPO: ReversibleEncryptionDisabled-Blue Ridge Technology Solutions LLC)

Setting: "Store password using reversible encryption" = DISABLED

Verified: HKLM\System\CurrentControlSet\Services\NetLogon\Parameters

3. VERIFICATION

Date: 2026-06-30 | Verifier: Nathan Cruz

Tool: LGPO / Get-ADDefaultDomainPasswordPolicy

ReversibleEncryptionEnabled: False

Result: PASS - Reversible encryption confirmed disabled.

Password transmission: All auth traffic uses Kerberos + TLS. No cleartext observed.

4. PLAINTEXT PASSWORD SEARCH

Scan tool: Microsoft Defender for Identity

Last scan: 2026-07-01

Plaintext passwords in traffic: 0 detected

5. CONCLUSION

Blue Ridge Technology Solutions LLC stores and transmits passwords with cryptographic protection only per control 3.5.10.
