BLUE RIDGE TECHNOLOGY SOLUTIONS LLC
INCIDENT RESPONSE CAPABILITY TESTING POLICY

=====

Document ID: POL-IR-003
Version: 1.0
Effective Date: May 10, 2026
Review Date: May 10, 2027
Owner: Nathan Cruz, Lead Systems Engineer
Approved By: Victor Osei, President

=====

1. PURPOSE

This policy requires periodic testing of BRTS's incident response capability to ensure it functions effectively when a real incident occurs.

2. TESTING METHODS

2.1 Tabletop Exercises

Conducted annually (minimum). A hypothetical security incident scenario is presented and staff walk through their response steps without affecting live systems. Participants: Nathan Cruz, Victor Osei, and any other relevant staff.

2.2 Functional Drills

Conducted annually (may be combined with tabletop or separate). Actual technical response actions are practiced on test/lab systems, including:

- Isolating a compromised system
- Preserving evidence (log export, disk image)
- Restoring from backup
- Notifying simulated stakeholders

2.3 Phishing Simulations

Conducted quarterly via KnowBe4 to test staff ability to recognize and report phishing emails (part of IR detection).

3. DOCUMENTATION

Each test/exercise produces:

- Scenario description
- Participants
- Response steps taken
- Gaps identified
- Corrective actions assigned (with owners and dates)

4. FREQUENCY

Tabletop exercise: annually (spring)
Functional drill: annually (fall)
Phishing simulation: quarterly
