BLUE RIDGE TECHNOLOGY SOLUTIONS LLC
INCIDENT RESPONSE TABLETOP EXERCISE REPORT
Evidence for CMMC Control 3.6.3

=====

Exercise Date: May 22, 2026
Facilitator: Nathan Cruz
Participants: Victor Osei (President), Nathan Cruz (IT Lead),
James Hartwell (Systems Engineer)
Scenario: Ransomware Attack on BRTS File Server

=====

SCENARIO DESCRIPTION

At 8:45 AM, Marcus Johnson reports that his workstation
(BRTS-WS-JOHNSON) is displaying a ransom note and he
cannot access any files on the shared drive.

RESPONSE WALKTHROUGH

Step 1 - Detection and Initial Response (0-30 minutes)

Actions discussed:

- Marcus isolates BRTS-WS-JOHNSON from network
(disconnect network cable, disable WiFi)
- Nathan Cruz notified immediately
- Nathan logs into Defender portal to assess scope
- Preliminary check: Which other systems show anomalous
activity? (Sentinel alert review)

Gaps identified: Marcus was unsure whether to pull the network
cable or just turn off the PC. Clarified: pull network cable,
leave PC on for forensics.

Step 2 - Scope Assessment (30-90 minutes)

Actions discussed:

- Identify all affected systems via Sentinel
- Determine if CUI was on affected shares
- Contact client accounts to assess exposure

Gaps identified: No written client contact list for incident
notification. ACTION: Nathan to create contact card by 6/1.

Step 3 - Containment (1-4 hours)

Actions discussed:

- Isolate affected systems to quarantine VLAN
- Disable compromised accounts
- Block malware IOCs at firewall

Step 4 - Eradication and Recovery (4-24 hours)

Actions discussed:

- Rebuild from known-good image (Veeam backup)
- Verify backup integrity before restore
- Restore most recent clean backup (tested: 2-hour RTO)

Step 5 - Reporting

Actions discussed:

- DIBNet report within 72 hours if CUI affected
- Document incident in IR register

FINDINGS AND CORRECTIVE ACTIONS

GAP 1: Staff unsure about physical isolation steps
Action: Update IR procedure card. Distribute to all staff.

Owner: Nathan Cruz | Due: June 1, 2026 | Status: COMPLETED

GAP 2: No written client incident notification contact list

Action: Create and store in IR binder and SharePoint

Owner: Nathan Cruz | Due: June 1, 2026 | Status: COMPLETED

GAP 3: Backup restore time not formally documented

Action: Document RTO/RPO in IR plan (2-hour RTO confirmed)

Owner: Nathan Cruz | Due: June 15, 2026 | Status: COMPLETED

EXERCISE RESULT: SUCCESSFUL - All major steps covered.

3 corrective actions identified and resolved.
