

## ■MAINTENANCE POLICY

Organization: Blue Ridge Technology Solutions LLC

Control: 3.7.3 - Equipment Sanitization

Version: 1.2 | Effective: 2026-01-15

Owner: Nathan Cruz, IT Manager | Approved: Victor Osei, Director of Operations

### 1. PURPOSE

This policy requires Blue Ridge Technology Solutions LLC to ensure that equipment removed for off-site maintenance is sanitized before release, per NIST SP 800-171 Rev. 2 control 3.7.3.

### 2. SCOPE

All Blue Ridge Technology Solutions LLC CUI system equipment that is removed from the facility for repair or maintenance.

### 3. REQUIREMENTS

- a. All CUI data is removed from equipment before it leaves Blue Ridge Technology Solutions LLC custody.
- b. If data cannot be removed, the equipment is escorted and not left unattended.
- c. Sanitization follows NIST SP 800-88 Guidelines for Media Sanitization.
- d. Sanitization is documented in the equipment maintenance log.
- e. Equipment returning from off-site maintenance is inspected and re-scanned before reconnection.

### 4. RESPONSIBILITY

Nathan Cruz, IT Manager, performs or verifies equipment sanitization before off-site release.

### 5. ENFORCEMENT

Equipment leaving the facility with CUI without sanitization is a security incident.
