

■MAINTENANCE IMPLEMENTATION EVIDENCE

Organization: Blue Ridge Technology Solutions LLC

Control: 3.7.3 - Equipment Sanitization

Prepared By: Nathan Cruz, IT Manager | Date: 2026-07-10

1. SUMMARY

Evidence that Blue Ridge Technology Solutions LLC sanitizes equipment before off-site maintenance release.

2. SANITIZATION PROCEDURE

Standard: NIST SP 800-88 Rev. 1 Guidelines for Media Sanitization

Method for Working Drives: Secure Erase (using manufacturer tools or DBAN)

Method for Faulty Drives: Physical destruction if cannot be wiped; documented

Method for SSDs: Manufacturer secure erase (NVMe Sanitize command)

Sanitization tool: Eraser v6.2 (Windows) / Manufacturer SSD Secure Erase Utility

3. SANITIZATION LOG (FY2026)

Date | Device | SN | Reason | Method | Technician | Verified

2026-05-19 | Laptop | HP-XW4892 | Off-site repair | BitLocker wipe + reset | Nathan Cruz | Victor Osei

2026-07-05 | USB Drive | KI-003 | Returned vendor | DBAN 2-pass | Nathan Cruz | Nathan Cruz

4. RETURN-FROM-MAINTENANCE INSPECTION

Date: 2026-05-22 | Device: HP Laptop (SN: HP-XW4892) | Returned from: HP Repair

Inspection by: Nathan Cruz

Checks:

- Physical integrity: OK
- Malware scan: Clean (Windows Defender full scan)
- Firmware hash: Verified against HP reference
- Re-enrolled in Intune: Yes
- CUI data restored from backup: Yes (encrypted)

5. CONCLUSION

Blue Ridge Technology Solutions LLC sanitizes equipment before off-site release and inspects it upon return per control 3.7.3.

Verified: Victor Osei, Director of Operations | Blue Ridge Technology Solutions LLC | 2026-07-10
