

■MAINTENANCE IMPLEMENTATION EVIDENCE

Organization: Blue Ridge Technology Solutions LLC

Control: 3.7.4 - Diagnostic Media Inspection

Prepared By: Nathan Cruz, IT Manager | Date: 2026-07-10

1. SUMMARY

Evidence that Blue Ridge Technology Solutions LLC scans diagnostic media for malicious code before use on CUI systems.

2. DIAGNOSTIC MEDIA SCAN PROCEDURE

Quarantine System: Standalone Windows 11 laptop (not domain-joined, not on CUI network)

Antivirus: Windows Defender + Malwarebytes Premium (updated to latest definitions before scan)

Scan Type: Full scan of all media content

Duration: Until scan completes with clean result

Step-by-step:

1. Connect media to quarantine laptop (air-gapped from CUI network)
2. Update AV definitions
3. Run full scan
4. Document results
5. If clean: media approved for use, affix green "SCANNED" sticker
6. If malware found: quarantine media, notify Victor Osei, do not use

3. DIAGNOSTIC MEDIA SCAN LOG (FY2026)

Date | Media Type | Source | AV Tool | Result | Approved By

2026-03-10 | USB (vendor) | Network Vendor | Defender+MBAM | Clean | Nathan Cruz

2026-05-20 | USB (HP) | HP Support | Defender+MBAM | Clean | Nathan Cruz

Media failures: 0

4. SCAN ENVIRONMENT

Quarantine Laptop: SCAN-WS-01 (not on blueridgetech.com network)

AV Definitions as of last scan: 2026-07-05

Internet access: Updates only (blocked on network firewall post-update)

5. CONCLUSION

Blue Ridge Technology Solutions LLC scans all diagnostic media for malware before use on CUI systems per control 3.7.4.
