BLUE RIDGE TECHNOLOGY SOLUTIONS LLC
REMOTE MAINTENANCE MFA REQUIREMENT POLICY

=====

Document ID: POL-MA-005
Version: 1.0
Effective Date: May 15, 2026
Review Date: May 15, 2027
Owner: Nathan Cruz, Lead Systems Engineer
Approved By: Victor Osei, President

=====

1. PURPOSE

This policy requires multi-factor authentication to establish remote maintenance sessions on BRTS systems, preventing unauthorized remote access under the guise of maintenance.

2. REQUIREMENT

All remote maintenance sessions - whether performed by BRTS internal IT staff or external vendors - must be established using MFA before the session is allowed to proceed.

3. INTERNAL REMOTE MAINTENANCE (Nathan Cruz)

- Remote sessions to BRTS servers initiated via VPN
- VPN requires Azure AD authentication + MFA (Authenticator)
- After VPN: RDP or SSH with domain credentials (Kerberos)
- Admin account (adm_ncruz) used for privileged remote tasks
- All admin remote sessions logged in Event Log + Sentinel

4. EXTERNAL VENDOR REMOTE MAINTENANCE

- External vendors are issued temporary VPN credentials for the duration of the maintenance window only
- VPN credentials include MFA requirement (Authenticator app set up on a KDG-controlled device, or TOTP shared via secure channel)
- Vendor sessions observed in real time by Nathan Cruz via session shadowing or screen sharing
- Vendor credentials are revoked immediately upon session end

5. PROHIBITED REMOTE MAINTENANCE METHODS

- Direct RDP exposed to internet without VPN: PROHIBITED
- Remote maintenance without MFA: PROHIBITED
- Consumer remote tools (TeamViewer, AnyDesk) without MFA: PROHIBITED
