

■ACCESS CONTROL IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.1.11 - Automatic Session Termination

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue automatically terminates sessions after defined inactivity periods.

2. SESSION TIMEOUT CONFIGURATIONS

Windows Endpoints (Interactive Sessions):

GPO: SessionTimeout-Bumpass Fire & Rescue

- Interactive session idle limit: 60 minutes
- Disconnected session limit: 60 minutes

Microsoft 365 / Azure AD:

- Persistent browser session: Disabled
- Sign-in frequency: 8 hours (Conditional Access policy: SignInFreq-Bumpass Fire & Rescue)
- Re-authentication required: Yes (includes MFA prompt)

SharePoint / CUI Portal:

- Session timeout: 30 minutes idle
- Token lifetime: 1 hour max

VPN (GlobalProtect):

- Max session duration: 8 hours
- Idle timeout: 60 minutes

3. VERIFICATION

Date: 2026-06-25 | Tested by: Mike Sadler

Test: Opened SharePoint CUI session on BFR-WS-001 (m.sadler@bumpassfire.org), left idle 35 minutes.

Result: Session expired after 30 minutes. Full re-authentication required. PASS.

4. CONCLUSION

Bumpass Fire & Rescue enforces automatic session termination across all CUI-connected systems per control 3.1.11.
