

■ACCESS CONTROL IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.1.12 - Remote Access Monitoring and Control

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue monitors and controls all remote access sessions to CUI systems.

2. VPN CONFIGURATION

Solution: GlobalProtect / Azure VPN Gateway

Tenant: bumpassfire.org

- All remote CUI access requires VPN connection
- Non-compliant devices blocked (Intune compliance gate)
- Max concurrent sessions per user: 1
- Session logging: Full (user, source IP, start/end time, bytes transferred)

3. REMOTE ACCESS LOG EXCERPT (June 2026)

Date | User | Source IP | Duration | Device

2026-06-03 | m.sadler@bumpassfire.org | 71.44.x.x | 2h 14m | BFR-WS-001 (Compliant)

2026-06-10 | m.sadler@bumpassfire.org | 71.44.x.x | 1h 05m | BFR-WS-001 (Compliant)

2026-06-22 | Unknown | 185.220.x.x | Blocked | Non-managed device

4. WEEKLY REVIEW

Date: 2026-07-07 | Reviewer: Mike Sadler

Result: 1 blocked attempt from unknown IP. No further action required. Logged to security register.

5. CONCLUSION

Bumpass Fire & Rescue monitors and controls all remote access sessions via VPN with full logging per control 3.1.12.
