

■ACCESS CONTROL IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.1.21 - Portable Storage on External Systems

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue limits portable storage use on external systems via technical and policy controls.

2. USB DEVICE CONTROL CONFIGURATION

Solution: Microsoft Intune Device Control

Policy Name: USBBlock-CUI-Bumpass Fire & Rescue

Applied to: All Intune-enrolled Windows endpoints (domain: bumpassfire.org)

Configuration:

- Default USB storage: BLOCK
- Allowed exceptions: IT-approved USB drives (allowlisted by hardware ID)
- Approved devices: 2 encrypted USB drives (Kingston IronKey D300S, SN: KI-001, KI-002)
- Non-allowlisted USB: Blocked + Event ID 4663 logged to Microsoft Sentinel

3. APPROVED PORTABLE STORAGE REGISTER

Device | Owner | Encrypted | Registered | Last Audit

KI-001 (32GB) | Mike Sadler | Yes (256-AES) | 2026-01-10 | 2026-06-30

KI-002 (32GB) | Randy Bowles | Yes (256-AES) | 2026-01-10 | 2026-06-30

4. USB BLOCK EVENT LOG (June 2026)

Date: 2026-06-14 - User: Staff-2 - Device: Generic USB drive - Action: BLOCKED

Reviewed by Mike Sadler: Confirmed personal drive, not approved. User reminded of policy.

5. CONCLUSION

Bumpass Fire & Rescue blocks unauthorized portable storage on CUI endpoints and maintains an approved device register per control 3.1.21.
