

■ACCESS CONTROL IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.1.6 - Use of Non-Privileged Accounts

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue requires use of non-privileged accounts for non-security functions.

2. DUAL ACCOUNT CONFIGURATION

IT Staff Affected: Mike Sadler, IT Coordinator

Standard Account: m.sadler@bumpassfire.org

- Used for: email, Teams, SharePoint, CUI document access
- Role: Contributor (no admin rights)

Admin Account: m.sadler-adm@bumpassfire.org

- Used for: Azure AD management, Intune, security configuration only
- Role: Global Admin (PIM-gated, requires MFA activation)
- Sign-in risk policy: Blocks non-admin workstation login

Conditional Access Policy: AdminAccount-WorkstationOnly enforces admin accounts cannot authenticate from non-compliant devices.

3. AUDIT VERIFICATION

Sign-in logs reviewed for admin account: 2026-06-01 to 2026-07-01

Admin account used only for: 4 Intune configuration sessions, 2 Azure AD changes.

No email or browser sessions detected on admin account.

4. SYSTEM DETAILS

Non-Privileged Workstation: BFR-WS-001 | Daily Account: m.sadler@bumpassfire.org

5. CONCLUSION

Bumpass Fire & Rescue enforces separation of privileged and non-privileged account use per control 3.1.6.
