BUMPASS FIRE & RESCUE
UNSUCCESSFUL LOGON ATTEMPT LIMITING POLICY

=====

Document ID: POL-AC-008
Version: 1.0
Effective Date: March 15, 2026
Review Date: March 15, 2027
Owner: Mike Sadler, IT Administrator
Approved By: Chief Randy Bowles

=====

1. PURPOSE

This policy limits the number of consecutive unsuccessful logon attempts to prevent brute-force attacks against BFR information systems.

2. LOGON ATTEMPT LIMITS

2.1 Workstations and Domain Accounts

- Maximum consecutive failed logons: 5
- Lockout duration: 30 minutes (auto-unlock)
- Observation window: 30 minutes
- After 5 failed attempts: account locks for 30 minutes
- IT admin can manually unlock sooner if needed

2.2 VPN Access

- Maximum failed VPN authentication attempts: 3
- After 3 failures: account suspended, IT must re-enable
- Alert sent to Mike Sadler on 3rd failure

2.3 Web-Based Applications

- Applications using Azure AD inherit the domain lockout policy (5 attempts / 30-minute lockout)
- Azure AD Smart Lockout: enabled

2.4 Mobile Devices (Intune-managed)

- Maximum PIN/passcode failures: 6
- After 6 failures: device wiped remotely

3. ENFORCEMENT

Enforced via Active Directory Account Lockout Policy GPO and Azure AD Smart Lockout settings.

4. LOGGING

All failed logon attempts logged to Windows Event Log (Event ID 4625) and Microsoft Sentinel.
