

■RISK ASSESSMENT IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.11.3 - Vulnerability Remediation

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue remediates vulnerabilities in accordance with risk-based timelines.

2. REMEDIATION SLA COMPLIANCE (Q2 2026)

Total vulnerabilities identified: 6

Critical: 0 | High: 0 | Medium: 3 | Low: 3

Remediation on time: 6/6 (100%)

SLA violations: 0

3. REMEDIATION LOG (Q2 2026)

Vuln ID	CVSS	Severity	Detected	Remediated	SLA	On Time
---------	------	----------	----------	------------	-----	---------

CVE-2026-1123	6.5	Medium	2026-04-10	2026-04-12	30 days	Yes (2 days)
---------------	-----	--------	------------	------------	---------	--------------

CVE-2026-2244	5.8	Medium	2026-05-22	2026-05-24	30 days	Yes (2 days)
---------------	-----	--------	------------	------------	---------	--------------

CVE-2026-3310	4.3	Medium	2026-06-01	2026-06-03	30 days	Yes (2 days)
---------------	-----	--------	------------	------------	---------	--------------

CVE-2026-0011	3.1	Low	2026-04-15	2026-06-01	90 days	Yes (47 days)
---------------	-----	-----	------------	------------	---------	---------------

CVE-2026-0022	2.5	Low	2026-05-01	2026-07-01	90 days	Yes (61 days)
---------------	-----	-----	------------	------------	---------	---------------

CVE-2026-0033	1.8	Low	2026-06-10	2026-07-08	90 days	Yes (28 days)
---------------	-----	-----	------------	------------	---------	---------------

4. EXCEPTION LOG

Exceptions requested: 0 (all vulnerabilities remediated within SLA)

5. PATCH DEPLOYMENT METHOD

Tool: Microsoft Intune (Windows Update for Business)

Automated: Security patches auto-approved and deployed within 3 days of release

Manual: Configuration changes documented in change log

6. CONCLUSION

Bumpass Fire & Rescue remediates all vulnerabilities within risk-based SLAs with 100% on-time rate per control 3.11.3.
