BUMPASS VOLUNTEER FIRE & RESCUE DEPARTMENT
SYSTEM SECURITY PLAN (SSP) – DEVELOPMENT AND MAINTENANCE POLICY

=====

Document ID: POL-CA-004

Version: 1.0

Effective Date: March 1, 2026

Review Date: March 1, 2027

Owner: Derek Holt, IT Coordinator

Approved By: Raymond Stubbs, Fire Chief

=====

1. PURPOSE

This policy requires Bumpass Fire & Rescue to develop, maintain, and regularly update a System Security Plan (SSP) that describes the security requirements and controls for all systems that process, store, or transmit CUI.

2. SSP REQUIREMENTS

2.1 Content

The SSP must document:

- System name and description
- System boundary and authorization boundary
- System environment of operation
- System interconnections with other systems
- How each NIST SP 800-171 requirement is implemented
- Personnel responsible for each control
- Planned implementation dates for any controls not yet met

2.2 System Coverage

The following systems are in scope for the SSP:

- Records Management System (RMS)
- Computer-Aided Dispatch (CAD) workstations
- Grant Administration Portal (web-based)
- Department file server and shared drives
- Microsoft 365 email environment

2.3 SSP Updates

The SSP must be reviewed and updated:

- Annually (by March 1 of each year)
- When a significant system change is made
- When a new system is added to scope
- When a security incident affects in-scope systems
- When NIST 800-171 requirements are updated

2.4 SSP Version Control

- SSP is version-controlled in SharePoint
- Previous versions retained for 3 years
- Change log maintained at the front of the document
- Current version signed by Fire Chief

3. RESPONSIBILITIES

- IT Coordinator: Author and maintain SSP
- Fire Chief: Review and approve SSP annually
- All staff: Cooperate with SSP review process

4. RELATIONSHIP TO POA&M

Security requirements not yet implemented are documented in the Plan of Action and Milestones (POA&M), which is an attachment to the SSP.
