

■SYSTEM AND COMMUNICATIONS PROTECTION IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.13.14 - Voice over IP

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue protects VoIP/collaboration sessions from unauthorized access.

2. TEAMS VoIP CONFIGURATION

Platform: Microsoft Teams (tenant: bumpassfire.org)

Encryption: SRTP (Secure Real-time Transport Protocol) for audio/video

Signaling: TLS 1.2+ for all session signaling

Media relay: Microsoft-managed media relay servers (SRTP encrypted)

3. TEAMS SECURITY POLICIES

Teams Admin Center Settings (tenant: bumpassfire.org):

- Anonymous users can join meetings: DISABLED
- External participants can give/request control: DISABLED
- Allow cloud recording: Restricted (only Mike Sadler and Randy Bowles may record)
- Lobby: All external users held in lobby until admitted by organizer
- Meeting chat for anonymous users: DISABLED

4. UNAPPROVED VoIP BLOCKING

Blocked by Defender for Endpoint (network indicator list):

- Zoom (consumer): Not blocked but policy prohibits for CUI conversations
- Discord: BLOCKED (network indicator)
- WhatsApp Web: BLOCKED (DLP policy)

Approved: Microsoft Teams only for CUI discussions

5. TEAMS MEETING ENCRYPTION

Mode: End-to-end encryption available for 1:1 calls (enabled by policy)

Group meetings: Microsoft 365-managed encryption (AES-256)

6. VoIP COMPLIANCE REVIEW

Date: 2026-06-30 | Reviewer: Mike Sadler

All Teams security settings confirmed in place. No unapproved VoIP usage detected in DLP or Defender logs.

7. CONCLUSION

Bumpass Fire & Rescue uses Microsoft Teams with SRTP/TLS encryption and guest restrictions for all CUI-related VoIP sessions per control 3.13.14.
