

■SYSTEM AND COMMUNICATIONS PROTECTION IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.13.15 - Session Authenticity

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue protects session authenticity via SPF, DKIM, and DMARC.

2. EMAIL AUTHENTICATION CONFIGURATION (domain: bumpassfire.org)

SPF Record:

DNS TXT record @ bumpassfire.org: v=spf1 include:spf.protection.outlook.com -all

Status: PASS (MXToolbox verified 2026-07-01)

Policy: Hard fail (-all) - rejects unauthorized senders claiming to be @bumpassfire.org

DKIM:

Selector: selector1._domainkey.bumpassfire.org

Key: 2048-bit RSA (Microsoft 365 managed)

Status: ACTIVE - all outbound email from M365 signed with DKIM

Verified: 2026-07-01 (MXToolbox DKIM lookup)

DMARC:

DNS TXT record _dmarc.bumpassfire.org: v=DMARC1; p=reject; rua=mailto:m.sadler@bumpassfire.org; pct=100

Policy: REJECT (100% of non-compliant messages rejected)

Reporting: Aggregate reports sent to Mike Sadler daily

3. DMARC REPORT SUMMARY (June 2026)

Total messages sent: 342

SPF+DKIM passed: 340 (99.4%)

Failed (rejected by recipient): 2 (investigated - both were legitimate forwarding edge cases, not spoofing)

Spoofing attempts blocked: 7 (DMARC rejection enforced)

4. WEB SESSION AUTHENTICITY

SharePoint CUI portal uses HTTPS with Microsoft-issued TLS certificate

Certificate: Valid until 2027-02-01, 2048-bit RSA key

HSTS: Enabled (max-age=31536000)

5. QUARTERLY REVIEW

Date: 2026-07-01 | Tool: MXToolbox

SPF: PASS | DKIM: PASS | DMARC: PASS (p=reject)

6. CONCLUSION

Bumpass Fire & Rescue protects email and session authenticity with SPF hard fail, DKIM signing, and DMARC reject policy per control 3.13.15.
