

■SYSTEM AND INFORMATION INTEGRITY IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.14.2 - Malware Protection

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue deploys anti-malware on all CUI endpoints.

2. ANTI-MALWARE DEPLOYMENT

Tool: Microsoft Defender for Endpoint (Plan 2)

Managed by: Microsoft Intune (tenant: bumpassfire.org)

Coverage: All CUI endpoints

3. DEFENDER STATUS (July 1, 2026 - Intune Report)

Device | Real-Time Protection | Definitions Updated | Last Scan | Status

BFR-WS-001 | ENABLED | 2026-07-01 03:14 | 2026-07-01 | Clean

WS-002 | ENABLED | 2026-07-01 03:15 | 2026-07-01 | Clean

Tamper Protection: ENABLED on all devices (prevents user from disabling Defender)

4. EMAIL PROTECTION

Microsoft Defender for Office 365 (tenant: bumpassfire.org):

- Safe Attachments: Enabled (all attachments sandboxed before delivery)
- Safe Links: Enabled (URLs checked at time-of-click)
- Anti-phishing: Enabled with impersonation protection for Mike Sadler and Randy Bowles
- Anti-malware: Enabled (auto-purge of quarantined email)

5. MALWARE DETECTION LOG (Q2 2026)

Date: 2026-05-14 - Threat: TrojanDownloader:HTML/Phish - Location: Email attachment - Action:

Quarantined by Defender for 0365

Date: 2026-06-22 - Threat: PUA:Win32/Softcoupon - Location: BFR-WS-001 - Action: Removed by Defender

- User notified

Total endpoint incidents: 1 (PUA, low severity, auto-remediated)

Total email threats blocked: 23 (all quarantined)

6. CONCLUSION

Bumpass Fire & Rescue protects all CUI endpoints and email with Microsoft Defender, updated daily, with tamper protection enabled per control 3.14.2.
