

■SYSTEM AND INFORMATION INTEGRITY IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.14.4 - Anti-Virus Signature Updates

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue maintains current anti-malware signature definitions on all CUI endpoints.

2. SIGNATURE UPDATE CONFIGURATION

Tool: Microsoft Defender for Endpoint

Update method: Automatic via Windows Update + Intune MDM

Update frequency: Multiple times daily (Microsoft Security Intelligence updates hourly)

User override: NOT permitted (Tamper Protection enforced)

3. DEFENDER SIGNATURE STATUS (July 1, 2026 - Intune Security Report)

Device | Platform | Engine Version | Definition Version | Last Updated | Status

BFR-WS-001 | Win 11 | 1.1.24050.2 | 1.413.125.0 | 2026-07-01 03:14 | Current

WS-002 | Win 11 | 1.1.24050.2 | 1.413.125.0 | 2026-07-01 03:15 | Current

Definition age: 0 days (same-day)

Latest available definition: 1.413.125.0 (verified via Microsoft Security Intelligence portal)

4. SIGNATURE UPDATE MONITORING

Intune compliance policy: DefenderSignature-Bumpass Fire & Rescue

Alert condition: Signature older than 3 days triggers Intune non-compliance flag

Non-compliant device action: Marked non-compliant, Conditional Access blocks CUI SharePoint access

5. WEEKLY DEFINITION CHECK (Intune Report - Week of 2026-06-30)

All devices: Current definitions, 0 days old. No alerts triggered.

6. CONCLUSION

Bumpass Fire & Rescue maintains current Defender signature definitions updated multiple times daily with automated Intune enforcement per control 3.14.4.
