

■SYSTEM AND INFORMATION INTEGRITY IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.14.6 - Security Monitoring

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue monitors for attacks and attack indicators using Microsoft Sentinel.

2. SENTINEL CONFIGURATION

Workspace: Bumpass Fire & Rescue-Sentinel (Azure Monitor, East US)

Data sources connected:

- Azure Active Directory sign-in logs
- Microsoft 365 Defender (Endpoint, Office 365, Cloud Apps)
- Azure Firewall logs
- Azure AD Audit logs

3. ACTIVE ANALYTICS RULES (Attack Detection)

Rule Name | Tactic | Severity

Successful brute-force attack | Credential Access | High

New admin user created (not Mike Sadler) | Privilege Escalation | High

Mass file deletion detected | Impact | High

Unusual outbound data transfer | Exfiltration | Medium

Sign-in from unfamiliar location | Initial Access | Medium

MFA fatigue attack (10+ prompts in 1 hr) | Credential Access | High

Malware detected by Defender | Execution | High

TOTAL ACTIVE RULES: 14

4. INCIDENT LOG (Q2 2026)

Date | Rule | Severity | Status | Resolution

2026-04-22 | Sign-in from unfamiliar loc. | Medium | CLOSED | False positive - Mike Sadler travel

2026-06-10 | Mass file deletion | High | CLOSED | Bulk SharePoint recycle - Randy Bowles approved action

No unreviewed incidents beyond 2-hour SLA.

5. DEFENDER FOR ENDPOINT ALERTS

Endpoint behavioral monitoring: Enabled on BFR-WS-001 and WS-002

EDR mode: Block (auto-remediates detected threats)

Alerts last 30 days: 0 (clean)

6. CONCLUSION

Bumpass Fire & Rescue monitors for attacks continuously via Microsoft Sentinel and Defender for Endpoint with 14 active analytics rules per control 3.14.6.
