BUMPASS FIRE & RESCUE
UNAUTHORIZED SYSTEM USE DETECTION POLICY

=====

Document ID: POL-SI-007
Version: 1.0
Effective Date: June 25, 2026
Review Date: June 25, 2027
Owner: Mike Sadler, IT Administrator
Approved By: Chief Randy Bowles

=====

1. PURPOSE

This policy establishes mechanisms to identify unauthorized use of BFR organizational information systems.

2. UNAUTHORIZED USE DEFINED

Unauthorized use includes:

- Access by former employees (accounts should be disabled)
- Access outside approved hours without justification
- Access to systems or data beyond a user's role
- Use of unapproved software on company devices
- Unauthorized hardware connected to BFR systems
- Unauthorized remote access tools
- Service accounts used for interactive logins
- Shared credential use (one person using another's account)

3. DETECTION MECHANISMS

3.1 User Behavior Analytics (Microsoft Sentinel + Azure AD)

- Baseline user behavior established automatically
- Deviations from baseline generate alerts (UEBA)
- Specific rules:
 - * Access during non-business hours
 - * Access to data sets not previously accessed
 - * Login from unusual geolocation
 - * High volume file access in short time

3.2 Account Usage Monitoring

- Disabled account login attempt: ALERT (Event ID 4625 + 4648)
- Service account interactive login: ALERT (Event ID 4624)
- Simultaneous logins from multiple IPs: ALERT

3.3 Software Inventory

- Intune software inventory detects unapproved applications
- Monthly review by Mike Sadler
- Unapproved software removed within 24 hours

3.4 Network Traffic Analysis

- Meraki IDS monitors for anomalous traffic patterns
- Unusual outbound data volume: alert

4. RESPONSE

Any confirmed unauthorized use is reported to Chief Bowles immediately and triggers the IR plan (POL-IR-001).
