INCIDENTS GENERATED

Incident #1 (June 8, 2026)
Rule: Brute Force - Azure AD
Details: 12 failed logon attempts for rthomas_bfr from IP 45.33.x.x (Linode datacenter) over 10 minutes, then success.
Investigation: User rthomas confirmed he was at a conference and connected via hotel WiFi through VPN. Blocked IP was a VPN exit node the hotel used. No compromise confirmed.
Resolution: Closed - False positive. Added IP range to exclusion.

Incident #2 (July 14, 2026)
Rule: After-Hours Logon + Data Access
Details: mpreskey logged in at 11:45 PM, accessed 3 CUI files.
Investigation: Mike Sadler contacted mpreskey morning of 7/15. User confirmed he was working late from home on deadline.
Resolution: Closed - Legitimate activity confirmed.

WEEKLY MANUAL REVIEW - July 21, 2026

Failed logons this week: 3 (normal range: 0-5)
After-hours access: 1 (accounted for above)
Large downloads (>500MB): 0
CUI access anomalies: 0
Result: No concerns identified.
