BUMPASS VOLUNTEER FIRE & RESCUE DEPARTMENT
MULTI-FACTOR AUTHENTICATION (MFA) POLICY

=====

Document ID: POL-IA-002
Version: 1.1
Effective Date: May 1, 2026
Review Date: May 1, 2027
Owner: IT Coordinator, Derek Holt
Approved By: Fire Chief, Raymond Stubbs

=====

1. PURPOSE

This policy requires multi-factor authentication (MFA) to protect access to Bumpass Fire & Rescue systems, especially those containing CUI related to federal grant programs and personnel records.

2. SCOPE

Applies to all personnel accessing department systems remotely or via privileged accounts, including the records management system, grant portal, and Microsoft 365.

3. MFA REQUIREMENTS

3.1 Required For:

- ALL network-based access to any department system
- ALL privileged/administrator account logins
- ALL remote access (VPN, remote desktop)
- Microsoft 365 / email access from any device
- Grant administration portal
- Any system containing CUI

3.2 MFA Method

The department uses Microsoft Authenticator app as the primary MFA method. Approved second factors include:

- Microsoft Authenticator push notification (preferred)
- Time-based one-time password (TOTP) via Authenticator
- SMS code (allowed only as backup – not preferred)

Hardware tokens are available for personnel without smartphones upon request to the IT Coordinator.

3.3 MFA Enrollment

- All personnel must enroll in MFA within 3 days of receiving a system account
- MFA enrollment is completed during IT onboarding session with Derek Holt
- Personnel who lose MFA access must contact Derek Holt immediately for recovery

3.4 MFA Bypass

- MFA cannot be bypassed except in documented emergency scenarios approved by the Fire Chief in writing
- Any MFA bypass event is logged and reviewed

4. ENFORCEMENT

Accounts without MFA enrollment cannot access network resources. The system is configured to enforce MFA at login.

5. REVIEW

Policy reviewed annually. Last reviewed April 28, 2026.
