BUMPASS FIRE & RESCUE
CUI IN-TRANSIT ENCRYPTION POLICY

=====

Document ID: POL-MP-006
Version: 1.0
Effective Date: May 5, 2026
Review Date: May 5, 2027
Owner: Mike Sadler, IT Administrator
Approved By: Chief Randy Bowles

=====

1. PURPOSE

This policy requires cryptographic mechanisms to protect the confidentiality of CUI during transport (both physical media transport and network transmission).

2. DIGITAL TRANSMISSION

All CUI transmitted over any network must be encrypted:

- Email: TLS 1.2+ required (enforced by M365 Exchange Online)

MIP sensitivity label "CUI" adds additional encryption

- File transfer: SFTP or DoD SAFE (HTTPS/TLS)
- Web access: HTTPS only (TLS 1.2 minimum, TLS 1.3 preferred)
- VPN: IKEv2 with AES-256 (all remote access)
- Internal network: Kerberos-encrypted domain communication

3. PHYSICAL MEDIA IN TRANSPORT

All portable media containing CUI must be encrypted:

- USB drives: hardware AES-256 (Kingston IronKey)
or BitLocker To Go with AES-256
- Laptops: BitLocker full-disk encryption (AES-256)
- External hard drives: BitLocker To Go

4. PROHIBITED TRANSIT METHODS

- Unencrypted HTTP transmission of CUI: PROHIBITED
- Unencrypted USB drives with CUI: PROHIBITED
- Sending CUI via unencrypted personal email: PROHIBITED
- Sending CUI via SMS text message: PROHIBITED
- FTP (unencrypted): PROHIBITED

5. VERIFICATION

Mike Sadler confirms encryption is active on all portable devices before CUI transport is authorized.
