

■ MEDIA PROTECTION IMPLEMENTATION EVIDENCE

Organization: Bumpass Fire & Rescue

Control: 3.8.9 - CUI Backup Protection

Prepared By: Mike Sadler, IT Coordinator | Date: 2026-07-10

1. SUMMARY

Evidence that Bumpass Fire & Rescue protects the confidentiality of CUI in backup storage.

2. BACKUP ARCHITECTURE

Primary Backup: Microsoft 365 Backup (Exchange, SharePoint, OneDrive)

- Encryption: AES-256 at rest (Microsoft managed)
- Geo-redundancy: Active (LRS + GRS replication)
- Access: Mike Sadler only (Backup Admin role in M365)
- Retention: 30 days granular + 1 year archive

Secondary Backup: External encrypted HDD (KI-BACKUP-01)

- Encryption: VeraCrypt AES-256 + SHA-512
- Key stored: Azure Key Vault (access: Mike Sadler only)
- Physical location: Locked cabinet, Mike Sadler's office
- Backup frequency: Monthly full backup

3. BACKUP ENCRYPTION VERIFICATION

Date: 2026-06-30 | Verifier: Mike Sadler

M365 Backup: Microsoft Compliance Center confirms AES-256 at rest for all content

External HDD: VeraCrypt volume header verified. Decryption attempted with test key - successful.

4. ACCESS CONTROL

M365 Backup Admin: Mike Sadler only

External HDD: Physical key held by Mike Sadler; spare with Randy Bowles in sealed envelope (emergency)

Key Vault access: Mike Sadler only (Reader); audit log enabled

5. BACKUP RESTORATION TEST

Date: 2026-05-15 | Tester: Mike Sadler

Test: Restored 3 CUI documents from M365 Backup

Result: Successful restore. Data integrity verified. Encryption maintained post-restore.

6. CONCLUSION

Bumpass Fire & Rescue protects CUI backups with AES-256 encryption and access controls per control 3.8.9.
