KEITH THE DRONE GUY LLC
REMOTE ACCESS CONTROL POINT POLICY

=====

Document ID: POL-AC-014
Version: 1.0
Effective Date: January 25, 2026
Review Date: January 25, 2027
Owner: Keith Merritt, Owner/IT Lead
Approved By: Keith Merritt, Owner

=====

1. PURPOSE

This policy requires that all remote access to Keith the Drone Guy LLC systems is routed through a managed, monitored access control point rather than directly to individual systems.

2. SINGLE ACCESS CONTROL POINT

All remote access must pass through the company VPN gateway:
Device: Cisco Meraki MX68 (primary)
Location: On-premises server room (collocated datacenter)
IP: [Redacted - documented in IT topology diagram]

3. PROHIBITED DIRECT ACCESS

- Direct internet-facing RDP to workstations: PROHIBITED
- Direct SSH to servers from internet: PROHIBITED
- Any remote access tool that bypasses the VPN gateway: PROHIBITED (e.g., TeamViewer, LogMeIn, AnyDesk)

4. PROCESS

- All staff must connect to VPN before accessing any company system remotely
- The VPN gateway authenticates users via Azure AD MFA before granting network access
- All remote sessions are logged at the gateway
- Only company-managed, Intune-enrolled devices may connect

5. MONITORING

Gateway logs reviewed weekly by Keith Merritt.
Any direct-access attempts blocked by firewall are alerted.
