KEITH THE DRONE GUY LLC
CUI INFORMATION FLOW CONTROL POLICY

=====

Document ID: POL-AC-003
Version: 1.2
Effective Date: February 15, 2026
Review Date: February 15, 2027
Owner: Keith Merritt, Owner/IT Lead
Approved By: Keith Merritt, Owner

=====

1. PURPOSE

This policy establishes how CUI is permitted to flow between systems, people, and locations at Keith the Drone Guy LLC, ensuring that CUI is not transmitted to unauthorized destinations or through unapproved channels.

2. APPROVED CUI FLOW PATHS

2.1 Internal Flows (Permitted)

- CUI may flow from the government client portal to the secure CUI project folder on the company NAS only
- CUI may be shared between authorized staff via the company Microsoft 365 tenant (encrypted in transit)
- CUI may flow to OneDrive for Business (CUI subfolder only) but NOT to personal OneDrive or consumer cloud services

2.2 External Flows (Permitted Only With Authorization)

- CUI may be transmitted to subcontractors holding an active DFARS 252.204-7012 flow-down agreement
- CUI may be returned to the government client via SFTP or the approved government portal (DIBBS, DoD SAFE, etc.)
- All external CUI transfers must be logged in the CUI Transfer Log (SharePoint: CUI-Logs)

3. PROHIBITED FLOWS

- Personal email (Gmail, Yahoo, Hotmail, etc.): PROHIBITED
- Consumer cloud storage (Dropbox, Google Drive): PROHIBITED
- Unencrypted FTP or HTTP: PROHIBITED
- Personal mobile devices not enrolled in Intune: PROHIBITED
- Printing CUI to uncontrolled network printers: PROHIBITED

4. TECHNICAL CONTROLS ENFORCING FLOW

- Microsoft 365 DLP policy blocks CUI from leaving the tenant to personal email addresses or consumer domains
- Conditional Access blocks CUI SharePoint access from non-Intune-enrolled devices
- Network firewall blocks outbound SMTP except via M365

5. MONITORING

Keith Merritt reviews M365 DLP incident reports weekly.
Any unauthorized CUI flow triggers immediate incident response.
