KEITH THE DRONE GUY LLC  
ANNUAL RISK REGISTER - 2026  
Evidence for CMMC Control 3.11.1

=====

Assessment Date: March 15, 2026  
Assessor: Keith Merritt  
Method: NIST SP 800-30 Rev 1 (simplified)

=====

RISK REGISTER - 2026

-----

| RISK ID | DESCRIPTION | LIKELIHOOD | IMPACT | LEVEL | MITIGATION |
|---------|-------------|------------|--------|-------|------------|
|---------|-------------|------------|--------|-------|------------|

-----

|       |                                                    |        |        |          |                                                |
|-------|----------------------------------------------------|--------|--------|----------|------------------------------------------------|
| RA-01 | Phishing attack leads to credential compromise     | HIGH   | HIGH   | CRITICAL | MFA (done), phishing training (done)           |
| RA-02 | Ransomware via malicious email attachment          | MEDIUM | HIGH   | HIGH     | Defender (done), backups (done), user training |
| RA-03 | Unpatched vulnerability exploited on workstation   | MEDIUM | HIGH   | HIGH     | Monthly patching (done)                        |
| RA-04 | CUI exfiltrated via personal cloud storage         | LOW    | HIGH   | MEDIUM   | DLP policies (done), USB control (done)        |
| RA-05 | Physical theft of laptop containing CUI            | LOW    | HIGH   | MEDIUM   | BitLocker (done), Intune wipe (done)           |
| RA-06 | Unauthorized physical access to server room        | LOW    | MEDIUM | LOW      | Keypad lock (done), camera (done)              |
| RA-07 | Insider threat - data theft                        | LOW    | HIGH   | MEDIUM   | Audit logging (done), access reviews (done)    |
| RA-08 | Cloud service outage (M365)                        | MEDIUM | MEDIUM | MEDIUM   | Accept risk (SLA 99.9%); offline backup copies |
| RA-09 | Supply chain compromise via vendor software update | LOW    | HIGH   | MEDIUM   | Vendor screening, software allow-list          |

RISK SUMMARY

-----

Critical risks: 1 (RA-01 - all mitigations already in place)  
High risks: 2 (mitigations in place)  
Medium risks: 4 (mitigations in place or accepted)  
Low risks: 2 (mitigations in place)

All HIGH/CRITICAL risks have active mitigations deployed.  
No unmitigated HIGH risks remain open.

Next assessment: March 2027
