KEITH THE DRONE GUY LLC
NETWORK BOUNDARY PROTECTION POLICY

=====

Document ID: POL-SC-001
Version: 1.0
Effective Date: March 30, 2026
Review Date: March 30, 2027
Owner: Keith Merritt, Owner/IT Lead
Approved By: Keith Merritt, Owner

=====

1. PURPOSE

This policy requires monitoring, controlling, and protecting organizational communications at external boundaries and key internal boundaries.

2. EXTERNAL BOUNDARY PROTECTION

- Cisco Meraki MX68 serves as the external boundary device (firewall, IDS/IPS, and VPN gateway)
- All internet traffic flows through the MX68
- Default deny-all inbound rule (only VPN traffic allowed in)
- Outbound traffic filtered by URL category (Meraki Content Filtering: blocks malicious sites, adult content, etc.)
- Meraki Threat Prevention: IPS/IDS signatures (updated daily)

3. INTERNAL BOUNDARY PROTECTION

- VLANs segment the internal network:
VLAN 10: Corporate (CUI workstations)
VLAN 20: Guest (internet only, isolated)
VLAN 30: IoT devices (isolated)
- Inter-VLAN routing controlled by Meraki firewall rules
- Guest VLAN has no access to Corporate VLAN

4. MONITORING

- Meraki Security Center: logs all IPS/IDS events
- DNS content filtering: Cisco Umbrella (blocks malicious DNS)
- Traffic anomalies forwarded to Microsoft Sentinel

5. MANAGEMENT TRAFFIC

- Out-of-band management where possible
- Meraki dashboard accessible only from VPN or registered admin MAC/IP
