

■SYSTEM AND COMMUNICATIONS PROTECTION IMPLEMENTATION EVIDENCE

Organization: Keith the Drone Guy LLC

Control: 3.13.3 - Security Function Separation

Prepared By: Keith Merritt, Owner-Operator | Date: 2026-07-10

1. SUMMARY

Evidence that Keith the Drone Guy LLC separates user functionality from system management functionality.

2. SEPARATION IMPLEMENTATION

Azure AD Roles:

- Standard Users: No admin role. Access to SharePoint, Teams, Exchange only.
- Keith Merritt Admin Account: Global Admin (PIM-gated). Used ONLY for admin tasks.
- Keith Merritt: Security Reader (read-only on security dashboards). No config access.

Management Portals Accessible Only to Keith Merritt:

- Azure Portal (portal.azure.com): Blocked by Conditional Access for non-admin accounts
- Microsoft 365 Admin Center: Blocked for non-admin accounts
- Intune Admin Center: Blocked for non-admin accounts
- Sentinel: Read-only for Keith Merritt, Contributor for Keith Merritt

3. TECHNICAL ENFORCEMENT

Conditional Access Policy: AdminPortal-RestrictedAccess

- Target: Access to Azure Portal, M365 Admin, Intune Admin
- Require: Global Admin or Intune Admin role (enforced by AAD RBAC)
- Standard users attempting access: BLOCKED with "You don't have permission" message

4. SEPARATION TEST

Date: 2026-06-20 | Tester: Keith Merritt

Test: Attempted to access Azure Portal with Staff-1 standard account (keithdroney.com)

Result: Access BLOCKED. "You need permission to access this." PASS.

5. CONCLUSION

Keith the Drone Guy LLC separates user and management functions via RBAC and Conditional Access per control 3.13.3.
