KEITH THE DRONE GUY LLC
NETWORK DEFAULT-DENY POLICY

=====

Document ID: POL-SC-006
Version: 1.0
Effective Date: April 5, 2026
Review Date: April 5, 2027
Owner: Keith Merritt, Owner/IT Lead
Approved By: Keith Merritt, Owner

=====

1. PURPOSE

This policy requires that network communications are denied by default and only permitted as explicitly authorized.

2. DENY-BY-DEFAULT IMPLEMENTATION

2.1 Perimeter Firewall (Meraki MX68)

Inbound rule: Deny all by default (explicit rule at bottom)
Outbound rule: Deny all by default (explicit rule at bottom)
Only exceptions above the deny rule are permitted.

2.2 Internal Firewall Rules (VLAN-level)

Cross-VLAN traffic is denied by default.
Only explicitly listed inter-VLAN rules are permitted.

2.3 Windows Defender Firewall

Domain profile: Outbound allow, Inbound block by default
Exceptions: Only listed applications and ports permitted
GPO enforces: Inbound connections that do not match a rule are blocked (Defender Firewall = ENABLED, Block inbound)

2.4 Azure NSG (Network Security Groups)

Default rules on all Azure NSGs:
DenyAllInBound: Priority 65500 - DENY all inbound
AllowVnetInBound (lower priority allows VNet internal)
All custom rules explicitly allow only required traffic.

3. DOCUMENTATION

All firewall exceptions are documented in the Firewall Rule Change Log (SharePoint: IT/Firewall-Rule-Log.xlsx).
New rules require Keith Merritt's approval.
