KEITH THE DRONE GUY LLC
AUDIT REDUCTION AND REPORT GENERATION POLICY

=====

Document ID: POL-AU-006
Version: 1.0
Effective Date: February 15, 2026
Review Date: February 15, 2027
Owner: Keith Merritt, Owner/IT Lead
Approved By: Keith Merritt, Owner

=====

1. PURPOSE

This policy describes how Keith the Drone Guy LLC reduces and reports audit data to support analysis without altering the original audit records.

2. AUDIT REDUCTION

Raw audit logs are voluminous and require reduction for practical review. KDG uses the following tools for audit reduction (summarizing without altering originals):

- Microsoft Sentinel workbooks (pre-built dashboards)
- KQL (Kusto Query Language) queries to filter relevant events
- Log Analytics saved queries for recurring review tasks

Audit reduction produces summaries and reports only. Original logs remain intact and unmodified in Azure Log Analytics.

3. REPORT GENERATION

The following reports are generated on a scheduled basis:

- Weekly Security Summary: failed logons, after-hours access, CUI file access (generated every Monday for prior week)
- Monthly Executive Summary: incidents, phishing results, training status (generated first Monday of each month)
- On-Demand Incident Reports: generated as needed during incident investigation

4. REPORT STORAGE

Reports are stored in SharePoint: IT/Audit-Reports/
Reports are retained for 3 years.

5. ORIGINAL LOG PROTECTION

Original logs in Azure Log Analytics may not be modified, deleted, or exported except by Keith Merritt, and only for authorized incident investigation purposes.
