SANITIZATION EVENTS - 2026

EVENT #1 - March 5, 2026
Device: KDG-LT-001 (Dell XPS 15)
Reason: Sent to Dell for screen replacement (ProSupport)
Sanitization: BitLocker drive encryption key destroyed
via: manage-bde -ForceRecovery then BitLocker
key destruction followed by full BitLocker
re-encryption before return to service.
In practice: BitLocker was active and key destroyed.
Data unreadable without key. Drive NOT removed
(Dell repair policy allows with key destroyed).
Method Reference: NIST SP 800-88 Rev 1 - Cryptographic Erase
Performed By: Keith Merritt
Date: March 5, 2026 (day before shipping)
Outcome: Dell repaired screen. Returned March 10.
New BitLocker key generated on return. CUI restored
from OneDrive backup after re-enrollment in Intune.

EVENT #2 - May 28, 2026
Device: KDG-WS-001 (desktop) - Hard Drive
Reason: Failed HDD sent to Seagate for warranty replacement
Sanitization: HDD removed from machine before shipping.
Attempted secure erase via SeaTools: drive too
damaged (logical failure) - erase not completed.
Physical destruction: drive taken to local
shredding service (Iron Mountain) on 05/28/2026.
Certificate of destruction on file.
Method Reference: NIST SP 800-88 Rev 1 - Physical Destruction
Performed By: Keith Merritt
Certificate: Iron Mountain COD #IM-2026-44821
Outcome: Seagate shipped new drive; no data at risk.
