MONEY STRAIGHT TALK LLC
DATA ENCRYPTION AT REST POLICY

=====

Document ID: POL-SC-005
Version: 1.1
Effective Date: April 1, 2026
Review Date: April 1, 2027
Owner: Terrell Banks, Systems Administrator
Approved By: Camille Odom, Managing Director

=====

1. PURPOSE

Money Straight Talk LLC stores CUI received under Department of Defense financial education contracts. This policy requires all CUI stored on company systems and media to be encrypted at rest using approved cryptographic methods.

2. ENCRYPTION REQUIREMENTS

2.1 Workstations and Laptops

- All company-issued Windows devices must have BitLocker full-disk encryption enabled with AES-256
- BitLocker recovery keys are stored in Azure AD
- Pre-boot authentication is required (PIN + TPM)
- FileVault is required on any Apple devices (none currently)
- BitLocker compliance monitored via Microsoft Intune

2.2 Servers and Cloud Storage

- Azure VM disks: Azure Disk Encryption (ADE) with customer-managed keys in Azure Key Vault
- SharePoint Online: encrypted at rest by Microsoft (AES-256 per Microsoft's encryption documentation)
- Azure Blob Storage (backup): SSE with AES-256, customer-managed keys (CMK)

2.3 Removable Media

- Any USB drive used to transport CUI must use BitLocker To Go encryption (AES-256)
- Unencrypted removable media containing CUI is prohibited
- See Media Protection Policy (POL-MP-001) for full details

2.4 Email at Rest

- Microsoft 365 mailboxes are encrypted at rest by Microsoft (per Microsoft's Service Encryption documentation)
- The CUI mailbox folder uses a sensitivity label with automatic encryption retention

3. KEY MANAGEMENT

- BitLocker keys backed up to Azure AD automatically
- Azure Key Vault used for all customer-managed keys
- Key access limited to Terrell Banks and Camille Odom
- Key rotation performed annually (June 1)

4. VERIFICATION

- Intune compliance report reviewed monthly
- Encryption status of all devices verified quarterly
- Any non-compliant device is quarantined from CUI access until encryption is confirmed

5. EXCEPTIONS

No exceptions to this policy are permitted for CUI storage.
Any system that cannot support encryption must not store CUI.
